

The Green Barrier™

Patented Design & Construction

Project: Swedish Roadside.

Detail: Economy Green Barrier™, 2.5m high with woven willow one side, 120mm Rockdelta noise absorbent core, and Galvanised Mesh on other side.

Woven panels just after installation, with climbers planted at the base.

Birds eye view of barrier top showing woven panels, the noise absorbent core, and mesh panel.

Rear / unimportant galvanised mesh side with fresh willow stems planted in front.

Mesh side 6 months later, with planted willow growing vigorously in front.
