

The Green Barrier™

Patented Design & Construction

- Project Profile:** University of Warwick
- Client:** University of Warwick
- Detail:** 170mtrs Non-acoustic Green Barrier in living Willow, c/w irrigation system.
- Objective:** Landscaping of university grounds.
- Construction date:** May 2005

The site prior to the barrier being installed.

The barrier has the ability to be curved into the desired shape.

An irrigation system has been installed along the length of the barrier.

The Green Barrier already blends in well with the surroundings and is producing strong green growth.

With acknowledgement to the University of Warwick.
