

The Green Barrier™

Patented Design & Construction

- Project Profile:** Bramhall, Stockport
- Client:** Multibuild Ltd
- Detail:** 52mtrs length x 2.5mtrs high acoustic Green Barrier, 1 side living willow 1 side metal, 240mm RockDelta core, c/w irrigation system.
- Objective:** To reduce noise from railway near to new residential area.
- Construction date:** February 2006

The site next to a railway line, before installation of the Green Barrier.

This barrier is constructed with one side living willow, a sound absorbing core, and the other side is metal security fencing.

The installation of the acoustic Green Barrier in living Willow nearing completion.

Only 4 months after planting the Willow has produced strong new growth and blends well with the additional planting.

With acknowledgement to Cliveden Homes.
