

The Green Barrier™

Patented Design & Construction

- Project Profile:** John Radcliffe Hospital, Oxford.
- Client:** HBG Construction Ltd.
- Detail:** 230 linear metres acoustic Green Barrier™ in woven willow. Panels constructed in heights of 1.8mtr to 4.0mtr.
- Objective:** The acoustic Green Barrier™ is required to abate the noise from road traffic and construction work on neighbouring private housing.
- Construction date:** March 2006

The site prior to the barrier being installed.

The acoustic insulation being installed and the facing panels erected.

The completed Green Barrier™

Climbers are taking hold and enhancing the appearance.
