Non Acoustic Green Barrier™ Hedge, in Living Willow

Product	Height	Prices from	Description
Non Acoustic Green Barrier™ Hedge, in Living Willow	1.50 - 2.50mtrs	from £78 per lin. mtr.	Living willow hedge supplied in pre-assembled sections for easy planting, providing and immediate screen and full height, mature hedge.

The living willow forms a structural component in the landscape and provides natural habitats for local wildlife. They are also graffiti resistant. The willow establishes very quickly after planting and creates an attractive green hedge only a few months after installation.

The panels are planted directly into topsoil to a depth of 600mm, providing support while the roots grow. Cheviot Trees supplies all of the necessary irrigation equipment required.

Non Acoustic Green Barrier™ Screen, in Woven Willow

Product	Height	Prices from	Description
Non Acoustic Green Barrier™ Screen, in Woven Willow	1.5 - 2.00mtrs.	£75 per lin. mtr.	Panels of dried willow rods held within a timber and steel frame to provide an attractive natural screen suitable for boundary fencing, screening and shelter.

They require minimal maintenance and are ideal for use when ground conditions are too poor for planting a living hedge.

The appearance of the screen can be complimented with many varieties of landscaping materials, including climbing plants, shrubs trees and mulches.
